## The Industrialized Structural Foam Core

# **DATA SHEET 11.2017 - Replaces 09.2017**

# **DESCRIPTION**

**AIREX**® **T10** is a closed-cell, thermoplastic and recyclable polymer foam with a very homogeneous cell structure, high mechanical properties and an outstanding price / performance ratio.

It has an extraordinary resistance to fatigue, is chemically stable, UV-resistant and has negligible water absorption. It is thermally stable during high temperature processing and post curing without after expansion or out-gassing. T10 is designed for easy use with all resin systems and processing technologies.

**AIREX**® **T10** is ideally suited for high volume applications of lightweight sandwich structures subjected to static and dynamic loads and/or exposed to elevated temperatures during manufacturing.

#### **CHARACTERISTICS**

- Very high compression and shear properties
- Outstanding fatigue strength
- Homogeneous cell structure
- Easy to process with all types of resin and lamination processes
- High process temperature up to 150 °C (short peaks up to 180 °C)
- Good adhesion (skin-to-core bond)
- Excellent long term thermal stability, up to 100 °C (212 °F)
- No water absorption, after expansion nor out-gassing
- Recyclable and recycled material
- Highly consistent material properties
- Comprehensive material traceability (machine-readable batch information on each foam sheet)

## **APPLICATIONS**

- Road: Structural and semi-structural parts in interior and exterior of cars Sidewalls, floors, skirts/covers of trucks
- Wind energy: Blades (shear webs & shells), nacelles
- Marine: Hulls, decks, superstructures, bulkheads, stringers, interiors
- Industrial: Covers, containers, X-ray tables, sporting goods

## **PROCESSING**

- Contact molding (hand/spray)
- Vacuum infusion (VARTM)
- Resin injection (RTM)
- Adhesive bonding
- Pre-preg processing
- Compression molding (GMT, SMC)
- Thermoforming
